HEADSHOTS

Your headshot will be cropped somewhere around your bicep level

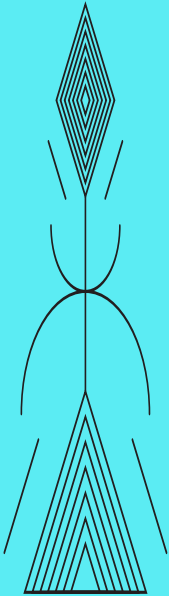

Because the shot will be a close up on your face, think about which neck line will suit you best

Don't match your outfit colour to your background

Add jewellery to create personality

Always wear shoes

NOTE WHAT SUITS YOU

FULL LENGTH SHOTS

What is your location

What poses do you hope to recreate

Outfit considerations:

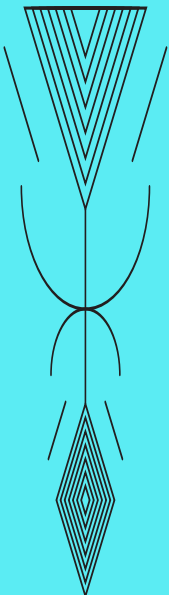

-You may need to bring a couple of outfit changes for your full-length shoot

-You can wear the same base outfit throughout, but add a jacket and change the accessories to make it look like a few different shoots

-Make sure that your outfits are robust enough to handle a couple of movements

Think about the temperature and the elements where you're shooting

JOT DOWN SOME STYLE IDEAS

Presentation For Stills

HAIR

Best advice ever....stick to what you know!

Go to the same hairdresser that always does your hair

I highly recommend getting your hair done professionally for every single photo shoot

Take in a photo of you wearing the outfits that you're going to be wearing in the shoot and show your hairdresser

WILL YOUR DIY OR BOOK IN?

MAKEUP

DIY

Go to a Mac cosmetics counter for a one hour makeover and get them to do your make up for you on the morning of the shoot

HIRING A PRO

Get referrals - reach out to your friends and colleagues

The most experienced and most expensive are not always the best

Hire a bridal hair and makeup artist

Create a Pinterest mood board of hair and makeup styles

Get your nails done, or at least groom them neatly, before the shoot

WILL YOU GOTO A MAC STORE OR HIRE A PRO OR DIY?

GROOMING FOR MEN

Go to the hairdresser at the best time for you

Invest in some hair gel or cream

In terms of make up for guys, the recommendation is only two products:

A translucent powder like Prep and Prime by Mac – just dust all over your face to stop shine

A concealer - covers up any blemishes, spots, and under eye dark circles

WHO CAN YOU ASK FOR POWDER & CONCEALER?

Mac prep & prime
